Report

Preparation of the Herbarium sheet and Authentication of plant

Student Name- Nayakwadi Muskan Munnawar

Class-SY. B pharm

Sem-4th

Div. -B

Roll No-61

Academic Year-2021-2022

Plant Synonym - Trigonella, Greek clover, flavourer

Vernacular Name / Common name- methi, saag methi, kasuri methi

Local Name – methi

Scientific name – Fenugreek

Biological Source – Fenugreek (*Trigonella foenum graecum*) is an annual plant belongs to the family Leguminosae. It is the famous spices in human food. The seeds and green leaves of fenugreek are used in food as well as in medicinal application that is the old practice of human history. The Fenugreek plant is native to Europe, Asia and Africa. It is also widely grown as a food crop in India, North Africa and Yemen. 03-Jul-2022

Genus- Trigonella

Species- : *T. foenum graecum*

Family- leguminosae

Microscopy of plant-

When observing fenugreek using microscopy, one might see:

PRINCIPAL

Ashokrao Mane College of Pharmacy
Peth-Vadgaon, Dist. Kolhapur.

Preparation of herbarium sheet and Authentication of plant

[BACK TO INDEX](#)

1. Flower structure:
2. Pollen Structure:
3. Stamen structure:
4. Ovary Structure:
5. Leaf structure:

Overall, microscopy of fenugreek can provide detailed information about the structure and function of its reproductive organs and other plant parts.

Macroscopy of plant-

When observing fenugreek using macroscopy, one might see:

1. Flower arrangement :Flower morphology consists of a large number of parameters, including the number and shape of petals, number of stamens, petal size and the number and arrangement of styles and ovaries. Some of these characters, for example, the size of floral organs, seem to be controlled by several genes, whereas single (five petals) versus double (>10 petals) was shown to be inherited by a single gene.
2. Petal color and shape: Fenugreek is an annual herb, 30 to 90 cm tall, and has light green leaves which are pinnately trifoliate. The flowers are papilionaceous and white or yellow in colour.
3. Leaf shape and color: . leaf shape, tip and base features, and margins (edges). Leaf surface characteristics vary and some may be smooth (glabrous) or with hairs (hirsute or pubescent), wrinkles (rugose), pustules (verrucose) or other interruptions of the surface.
4. Pigment : Mature fenugreek leaves contains large amount of green coloured chloroplast, which are largely responsible for its dark green colour.

Overall plant structure, and overall plant size.

Phytochemistry- The aqueous extract and alcoholic extract were used for analyzing the main phytochemical , nutrient and active groups composition of fenugreek seeds powder (*Trigonella foenum graecum*).The preliminary tests of active groups in extracts were carried out. It appeared to contain (alkaloids , flavonoids , steroids , carbohydrates, terpenes , tannins , saponins , glycosides , free amino acid , crude protein and phenolic compounds) . The extracts were different in their content of active groups quantitatively and qualitatively . The amount of moisture and crude fiber , total ash , total oil , concentration of crude protein , carbohydrate , nitrogen content and caloric value on a dry weight basis , were found to be (6.833±0.531) humidity ,solid material (93.166±0.531) , crude fiber (17.0±0.2) , the percentage of total ash were (3.566±0.478) ,

Preparation of herbarium sheet and Authentication of plant

[BACK TO INDEX](#)

the percentage of total oil (7.15 ± 0.25), concentration of crude protein (28.45 ± 0.15), while the concentration of carbohydrates (1340 ± 0.029 mg/100g), and the caloric value for fenugreek seeds powder is (5544.9) kcal/100g. The quantitative content of (alkaloids, flavonoids, steroids, tannins, free amino acid, saponins) were estimated. The results indicated that the percentage alkaloids ($1.8 \pm 0.1\%$), percentage of flavonoids was ($12.135 \pm 0.465\%$), while the concentration of steroids (214 ± 0.024 mg/100g), tannin concentration (63.69 ± 1.67 mg/100g), and amino acid concentration (70 ± 0.064 mg/100g), and percentage of saponine was ($25.65 \pm 0.69\%$). The present study showed that fenugreek seeds is a very rich energy and antioxidant. So that is very important to be entered the system of human nutrition, are economic nutritional source can be used as human food supplement, which contains important amounts of carbohydrates, protein, fat and amino acids.

Medicinal uses-

1. *Diabetes.* Some research shows that consuming fenugreek seed, mixed with food during a meal, lowers blood sugar levels after the meal in people with type 2 diabetes. However, while taking 5-50 grams of fenugreek seed once or twice daily seems to work, lower doses of 2.5 grams don't seem to work. In people with type 1 diabetes, taking 50 grams of fenugreek seed powder twice daily seems to reduce the amount of sugar.
2. *Improving sexual performance.* Taking 600 mg of a specific fenugreek seed extract (Testofen, Gencor Pacific Ltd) each day seems to improve ability and interest in sex in older men that have started to lose interest and in healthy younger men
3. *Painful menstrual periods (dysmenorrhea).* Taking 1800-2700 mg of fenugreek seed powder three times daily for the first 3 days of a menstrual period followed by 900 mg three times daily for the remainder of two menstrual cycles reduces pain in women with painful periods. The need for painkillers was also reduces
4. lowering blood sugar levels, boosting testosterone, and increasing milk production in people who are breastfeeding. Fenugreek may also reduce cholesterol levels, lower inflammation, and help with appetite control, but more research is needed in these areas.

Value Added Course

Title of the Value Added Course:

Preparation of Herbarium Sheet and authentication of plant

Objectives of the Practice:

No university a part of curriculum can adequately cover all areas of importance or relevance. It is important for higher education institutions to supplement the curriculum to make students better prepared to meet industry demands as well as develop their own interests and aptitudes. Our college offers a wide variety of short term and also long-term certificate course which are conducted after class hours or during semester breaks. These courses are conducted by relevant subject teachers which help students stand apart from the rest in the job market by adding further value to their carriers. To learn Organizational structure and industry expectations as fresher's

- To develop strong foundation in fundamental science for scientific understanding.
- A holistic development of academic excellence to contribute effectively to the understanding of plant sciences.
- To equip the students with the basic skills in identifying and labelling different plants.
- To impart quality education in the field of Pharmacognosy enabling our students to confidently face the job market.
- To sensitize the students towards the need for keeping the environment clean and conserve our natural resources.

- Understand the universal nature of science and demonstrate the use of scientific method.
- To lay a strong foundation to the study in Pharmacognosy and Phytochemistry and impart in sight in to be different types of medicinal plants, its classification in the living kingdom.
- Appreciate the world of organisms and its course of evaluation and diversity & develop basic skills to study pharmacognosy in detail.
- To develop skill in practical work, experiment use of biological tools and techniques.
- To develop problem solving skills in the students to carry out innovative research projects and creation of spirit of knowledge in them.
- Proficiency in the use of recent and advance botanical or herbal technologies.
- Awareness to explore the student's different life forms of organisms at cellular, molecular and nano level and inspire to disseminate the concept of biodiversity conservation.
- To provide facilities for determination of any material including new taxa and to enable preparation of new monographs and floras.
- To assemble data for working out ranges and ecological distribution.
- To provide material for specific research as in plant anatomy, palynology and ethno botany and also for molecular research.
- To preserve specimens of historic importance and to assemble data for working out ranges and ecological distribution.

Estd. 2006
Ashokrao Mane College of Pharmacy
Peth-Vadgaon, Dist. Kolhapur

Outcomes:

1. The herbarium is used as a repository for the study of plants specimen. Herbarium provides instant referrals in taxonomical studies. They give histological and geographical information about different plant species.
2. It provides detailed scientific information about the plants for research and exhibition and thus acts as a quick referral system in taxonomic studies.
3. A herbarium provides information about the distribution and occurrences of certain plant species. Herbaria provides scientific information about the plants

PATHOLOGY LABORATORY WORK PRACTICE REPORT

NAME OF THE STUDENT: CHOUGULE MAYURI RAJENDRA

(IN CAPITAL LETTERS)

Mobile : 8010979498

Email ID : mayurichougule2706@gmail.com

Academic Year : 2021-2022

Name & Address of Laboratory : Galaxy Clinical Laboratory
Takawade, Tal- Shirol

Name of Lab Assistant : Gouslozom Shoukat Shaikh

Proprietor/Partner : Proprietor

Registration No : 200210087

Pathology Laboratory work Practice in Recognized Laboratory for a period of not less than 30 hours done after the college working hours during B. Pharm II semester. (Candidate should submit two copies of the report duly certified by the authorities of the practice centre.)

Date: 04-05-2022

Place: peth-vadgaon

Galaxy Clinical Laboratory
 Takawade, Tal. Shirol
 Mob. No. 9325338388

Value Added Course

Title of the Value Added Course: PATHOLOGY LABORATORY WORK PRACTICE

Objectives of the Practice

- 1) Knowledge of mechanisms of disease including the etiology, local or systemic responses to disease.
- 2) To develop professional and administrative skills required of effective clinical pathology.

To gain experience in various aspects of pathology laboratory work practice.

- To fulfill the gap between theory and practical knowledge.
- Students are able to study the causes and effects of disease or injury.
- Study of the mechanisms of disease that lead to the signs and symptoms that must be recognized in patients
- Students are able to understand the processes involved in testing for disease and the reporting of diagnostic tests.

The Context: The reports are done by the students. The report includes,

1) Detail Of Training

- Basic Laboratory equipments and machinery
- Principle and procedure
- Solutions and reagents used in lab

PRINCIPAL
Ashokrao Mane College of Pharmacy
Peth-Vadgaon, Dist. Kolhapur.

- Methods of withdrawing blood
- Appropriate location site for obtaining blood sample
- Labeling of sample
- Updating patient records
- Maintaining of equipments and quality control
- Guidelines for Good Clinical Laboratory practice
- Disposable of wastes

2) List of Tests carried out in Laboratory

- Total CBC
- Routine Urine Analysis
- Renal function test
 - Chemical test in renal disease
- Gastric function test
- Liver function test
- Cardiac profile test
- Staining methods and Aseptic techniques
- Study of gram positive and gram negative bacteria
- Identification of bacteria
- Routine coagulation test
- Hematological test

- Blood banking techniques and transfusion methods
- Blood group detection methods
- Techniques used for separation of blood composition
- Record keeping and documentation
- Diagnosis of disease

The Practice: Students should practice in nearby pathology laboratory for a period of not less than 30 hours done after the college working hours during II semester of B. Pharmacy. The reports are prepared by the students. The report includes the details about the practice.

Learning Outcome-

- 1) Students are able to study the causes and effects of disease or injury.
- 2) Understanding the mechanisms of disease that lead to the signs and symptoms that must be recognized in patients
- 3) Understanding the cause of disease, the processes involved in testing for disease and the reporting of diagnostic tests.

Value Added Course

Title of the Value Added Course: COMMUNITY PHARMACY PRACTICE

Objectives of the Practice: Community pharmacy, also well-known as retail pharmacy, is the most common type of the pharmacy that allows the public access to their medications and the advice about their health. Practice in medical will be a Practical exposure for students.

- To gain experience in various aspects of community pharmacy practice.
- To fulfill the gap between theory and practical knowledge.
- To develop practical skills that will enable the student to enhance the quality of Counseling of patients and advance pharmaceutical care in the community setting.
- To provide experiences in order to enhance communications skills when dealing with patients and with other healthcare providers.

The Context: The reports are done by the students. The report includes,

- **Prescription:** A prescription is an order for medicine which a doctor writes, and which is given to a pharmacist to prepare and administer the medicine.

Prescription include following steps-

- 1) Receiving and Reviewing Prescription
- 2) Translating the Prescription
- 3) Data Entry
- 4) Filing the Prescriptions
- 5) Patient Counseling

- **Dispensing:**Dispensing refers to the process of preparing and giving medicine to a named person on the basis of a prescription. Prescription includes following steps-
 - 1) Receive and validates the prescription.
 - 2)Understand and interpret the prescription.
 - 3) Select and label medicinefor issue.
 - 4)Make a final check.
 - 5) Record the action taken.
 - 6) Issue medicines to the patient with clear instruction and advice.
 - **Inventory control of medicines:**Receive and inspect products. The first step in the inventory management process includes1) Receiving your order from the supplier2) Sort and stock products. 3) Accept customer order. 4) Fulfil, package and ship order. 5)Reorder new stock.
 - **Purchase, sale of medicines and Accounting:**Purchase includes,
 - 1) Identification of the need
 - 2) The description of the product characteristics
 - 3) Drafting the specifications
 - 4) Supplier sourcing
 - 5) In-depth analysis of applications
 - 6) Preparing for the negotiation
- Sale includes,
- 1) Receive Mail Order
 - 2) Details Verification
 - 3) Data Conversion Entry

- 4) Medication Refill Check
- 5) Organizing Prescribed Medicines
- 6) Order Placement & Tracking
- 7) Billing Management

The Practice: Students should practice in nearby medical shop for a period of not less than 30 hours done after the college working hours during V/VI semester of B. Pharmacy. The reports are prepared by the students. The report includes the details about the practice. And also, the community pharmacist award for Best practice of community pharmacy is declared.

Evidence of Success: After completion of the practice in community pharmacy students successfully submitted the reports. And also, on the occasion of pharmacist day the best community pharmacist award to the Pharmacist will be given for their true service towards the wealthy society. The Best pharmacist from Vadgaon will be identified and felicitated.

Course Outcomes –

Upon successful completion of this Course Students will have the knowledge and skills about-

1. Handling of the Prescription and dispense the proper medicines.
2. To Counsel the patients about the medicines, diet & proper dose.
3. To acquire the knowledge about the side effects of the drug.
4. To fulfill the gap between the theory and practical knowledge while dealing with the patients.

**HERBARIUM SHEET REPORT****“Preparation of Herbarium Sheet & Authentication of Plant”**

Student name: - Prathamesh Dhanaji Patil

Academic Year: - 2019-2020

Roll no: - 82

Division: - B

Class: -F.Y.B.Pharm

Sem: - I

Name of plant: - Marigold

Calendula officinalis

➤ **Plant synonym:** - Pot Marigold, Zendu

➤ **Vernacular name / common name:** - Marigold

➤ **Local name:** - Zendu

➤ **Scientific name:** - Calendula officinalis

➤ **Biological sources:** - Calendula officinalis, the pot marigold, common marigold, ruddles, Mary's gold or Scotch marigold is a flowering plant in the daisy family Asteraceae. It is probably native to southern Europe, though its long history of cultivation makes its precise origin unknown, and it may possibly be of garden origin.

➤ **Genus:** - Tagetes erecta

➤ **Species:** - marigold (*Tagetes erecta*).

➤ **Family:** - Asteraceae

➤ **Microscopy of plant:** - Mexican marigold is an erect annual herb that grows up to a height of 180 cm. The inflorescence is a solitary terminal head, up to 12 cm in diameter, bright

PRINCIPAL

Ashokrao Mane College of Pharmacy
Peth-Vadgaon, Dist. Kolhapur.

[BACK TO INDEX](#)

yellow in wild types, lemon-yellow to deep brown-red in cultivated types. There are numerous (mostly ornamental) cultivars of Mexican marigold, differing in flower colour, flower size and plant height

➤ **Chemical Constitution: -**

The major components were identified as cis-ocimene (18.46%), (E)-oscimene (8.65%), l-limonene (11.16%), (E)-tagetone (10.56%), b-caryophyllene (6.9%) and dl-limonene (4.16%). The essential oil was evaluated in vitro for antioxidant activity using specific assays. A significant antioxidant and radical scavenging activity was observed. The oil also exerted significant antifungal activity against the phytopathogenic fungi, *Rhizoctonia solani*, *Sclerotium rolfsii* and *Macrophomina phaseolina* and antibacterial activity against *Xanthomonas oryzae*, *Klebsiella pneumonia*, *Pseudomonas aeruginosa*.

➤ **Phytochemistry: -** phytochemical screening test on marigold leaf extract showed that marigold leaves contained alkaloids, anthocyanins, betacyanin, cardio glycosides, coumarins, flavonoids, glycosides, phenolics, quinones, saponins, steroids, terpenoids and tannins.

➤ **Medicinal uses: -**

Fevers, Jaundice, Stomach ulcers, Conjunctivitis (pink eye), Liver problems, Burns and wounds, to stop bleeding

➤ **Diagram: -**

Value Added Course

Title of the Value Added Course:

Preparation of Herbarium Sheet and authentication of plant

Objectives of the Practice:

No university a part of curriculum can adequately cover all areas of importance or relevance. It is important for higher education institutions to supplement the curriculum to make students better prepared to meet industry demands as well as develop their own interests and aptitudes. Our college offers a wide variety of short term and also long-term certificate course which are conducted after class hours or during semester breaks. These courses are conducted by relevant subject teachers which help students stand apart from the rest in the job market by adding further value to their carriers. To learn Organizational structure and industry expectations as fresher's

- To develop strong foundation in fundamental science for scientific understanding.
- A holistic development of academic excellence to contribute effectively to the understanding of plant sciences.
- To equip the students with the basic skills in identifying and labelling different plants.
- To impart quality education in the field of Pharmacognosy enabling our students to confidently face the job market.
- To sensitize the students towards the need for keeping the environment clean and conserve our natural resources.

- Understand the universal nature of science and demonstrate the use of scientific method.
- To lay a strong foundation to the study in Pharmacognosy and Phytochemistry and impart in sight in to be different types of medicinal plants, its classification in the living kingdom.
- Appreciate the world of organisms and its course of evaluation and diversity & develop basic skills to study pharmacognosy in detail.
- To develop skill in practical work, experiment use of biological tools and techniques.
- To develop problem solving skills in the students to carry out innovative research projects and creation of spirit of knowledge in them.
- Proficiency in the use of recent and advance botanical or herbal technologies.
- Awareness to explore the student's different life forms of organisms at cellular, molecular and nano level and inspire to disseminate the concept of biodiversity conservation.
- To provide facilities for determination of any material including new taxa and to enable preparation of new monographs and floras.
- To assemble data for working out ranges and ecological distribution.
- To provide material for specific research as in plant anatomy, palynology and ethno botany and also for molecular research.
- To preserve specimens of historic importance and to assemble data for working out ranges and ecological distribution.

Outcomes:

1. The herbarium is used as a repository for the study of plants specimen. Herbarium provides instant referrals in taxonomical studies. They give histological and geographical information about different plant species.
2. It provides detailed scientific information about the plants for research and exhibition and thus acts as a quick referral system in taxonomic studies.
3. A herbarium provides information about the distribution and occurrences of certain plant species. Herbaria provides scientific information about the plants

General Awareness Program on Covid-19 with Clinical Efficacy		
Sr. No.	Name of Module	Duration (hrs.)
1.	Covid-19	5
2.	Bioavailability	10
3.	Dissolution	10
4.	Role of BCS	5

Outcomes:

- Students will able to know more information about Covid 19.
- Students will able to know the bioavailability and Bioequivalence and its use or role in Covid 19 treatment.
- Students will able to understand the role of BCS in Covid 19 clinical efficacy study.

Value Added Course

Title of the Value-Added Course:

Preparation of Herbarium Sheet and authentication of plant

Objectives of the Practice:

No university a part of curriculum can adequately cover all areas of importance or relevance. It is important for higher education institutions to supplement the curriculum to make students better prepared to meet industry demands as well as develop their own interests and aptitudes. Our college offers a wide variety of short term and also long-term certificate course which are conducted after class hours or during semester breaks. These courses are conducted by relevant subject teachers which help students stand apart from the rest in the job market by adding further value to their carriers. To learn Organizational structure and industry expectations as fresher's

- To develop strong foundation in fundamental science for scientific understanding.
- A holistic development of academic excellence to contribute effectively to the understanding of plant sciences.
- To equip the students with the basic skills in identifying and labelling different plants.
- To impart quality education in the field of Pharmacognosy enabling our students to confidently face the job market.
- To sensitize the students towards the need for keeping the environment clean and conserve our natural resources.
- Understand the universal nature of science and demonstrate the use of scientific method.

- To lay a strong foundation to the study in Pharmacognosy and Phytochemistry and impart in sight in to be different types of medicinal plants, its classification in the living kingdom.
- Appreciate the world of organisms and its course of evaluation and diversity & develop basic skills to study pharmacognosy in detail.
- To develop skill in practical work, experiment use of biological tools and techniques.
- To develop problem solving skills in the students to carry out innovative research projects and creation of spirit of knowledge in them.
- Proficiency in the use of recent and advance botanical or herbal technologies.
- Awareness to explore the student's different life forms of organisms at cellular, molecular and nano level and inspire to disseminate the concept of biodiversity conservation.
- To provide facilities for determination of any material including new taxa and to enable preparation of new monographs and floras.
- To assemble data for working out ranges and ecological distribution.
- To provide material for specific research as in plant anatomy, palynology and ethno botany and also for molecular research.
- To preserve specimens of historic importance and to assemble data for working out ranges and ecological distribution.

Module 1: Introduction of herbarium, types and functions (06hrs)

Meaning of herbarium, history, role of herbarium in teaching and research, types of herbaria, function of herbaria, acronym of herbaria and importance of the herbaria in the world.

Dr. B. Mane
PRINCIPAL
Ashokrao Mane College of Pharmacy
Peth-Vadgaon, Dist. Kolhapur.

[BACK TO INDEX](#)

Shri. Balasaheb Mane Shikshan Prasarak Mandal, Ambap's
ASHOKRAO MANE COLLEGE OF PHARMACY

Approved by PCI & AICTE New Delhi, DTE-Government of Maharashtra,
Affiliated to Shivaji University, Kolhapur

Peth Vadgaon Tal. Hatkanangale, Dist. Kolhapur (MH) PIN 416 112
Web: www.amcoph.org | Phone: 0230-2471360 61 | E mail: copbpharm@gmail.com

Module 2: Major role of herbarium, importance, plant specimen and authentication (06hrs)

Role in teaching & research, importance of herbaria in the world, herbaria in the India, preparation of plant specimens for deposit as herbarium vouchers.

Module 3: Herbarium processing methodology, records keeping, maintenance of herbarium, virtual herbarium (10hrs)

Field work and selection of material, processing of plant specimen like collection, drying of sample, poisoning of sample, mounting of sample, stitching and labelling sample, deposition of plant sample, maintenance and specimen care of herbarium from insects & pest with repellents and fumigation use, virtual herbarium & its advantages.

Module 4: Basic botanical and practical skills (8hrs)

Initial preparations, obtain collection permit, establish official contacts, arrangement with herbarium to deposit a specimen, assess field equipment's and supplies, pressing and mounting specimen techniques like spatula & needle method, proper labelling, storage, record keeping & conservation of specimens

Outcomes:

1. The herbarium is used as a repository for the study of plants specimen. Herbarium provides instant referrals in taxonomical studies. They give histological and geographical information about different plant species.
2. It provides detailed scientific information about the plants for research and exhibition and thus acts as a quick referral system in taxonomic studies.
3. A herbarium provides information about the distribution and occurrences of certain plant species. Herbaria provides scientific information about the plants.

Value Added Course

Title of the Value-Added Course:

Preparation of Herbarium Sheet and authentication of plant

Objectives of the Practice:

No university a part of curriculum can adequately cover all areas of importance or relevance. It is important for higher education institutions to supplement the curriculum to make students better prepared to meet industry demands as well as develop their own interests and aptitudes. Our college offers a wide variety of short term and also long-term certificate course which are conducted after class hours or during semester breaks. These courses are conducted by relevant subject teachers which help students stand apart from the rest in the job market by adding further value to their carriers. To learn Organizational structure and industry expectations as fresher's

- To develop strong foundation in fundamental science for scientific understanding.
- A holistic development of academic excellence to contribute effectively to the understanding of plant sciences.
- To equip the students with the basic skills in identifying and labelling different plants.
- To impart quality education in the field of Pharmacognosy enabling our students to confidently face the job market.
- To sensitize the students towards the need for keeping the environment clean and conserve our natural resources.
- Understand the universal nature of science and demonstrate the use of scientific method.

PRINCIPAL

Ashokrao Mane College of Pharmacy
Peth-Vadgaon, Dist. Kolhapur.

BACK TO INDEX

Shri. Balasaheb Mane Shikshan Prasarak Mandal, Ambap's
ASHOKRAO MANE COLLEGE OF PHARMACY

- To lay a strong foundation to the study in Pharmacognosy and Phytochemistry and impart in sight in to be different types of medicinal plants, its classification in the living kingdom.
- Appreciate the world of organisms and its course of evaluation and diversity & develop basic skills to study pharmacognosy in detail.
- To develop skill in practical work, experiment use of biological tools and techniques.
- To develop problem solving skills in the students to carry out innovative research projects and creation of spirit of knowledge in them.
- Proficiency in the use of recent and advance botanical or herbal technologies.
- Awareness to explore the student's different life forms of organisms at cellular, molecular and nano level and inspire to disseminate the concept of biodiversity conservation.
- To provide facilities for determination of any material including new taxa and to enable preparation of new monographs and floras.
- To assemble data for working out ranges and ecological distribution.
- To provide material for specific research as in plant anatomy, palynology and ethno botany and also for molecular research.
- To preserve specimens of historic importance and to assemble data for working out ranges and ecological distribution.

Module 1: Introduction of herbarium, types and functions (06hrs)

Meaning of herbarium, history, role of herbarium in teaching and research, types of herbaria, function of herbaria, acronym of herbaria and importance of the herbaria in the world.

[Signature]

Peth Vadgaon Tal. Hatkanangale, Dist. Kolhapur (MH) PIN 416 112
Web: www.amcoph.org | Phone: 0230-2471360 61 | E mail: copbpharm@gmail.com

Module 2: Major role of herbarium, importance, plant specimen and authentication (06hrs)

Role in teaching & research, importance of herbaria in the world, herbaria in the India, preparation of plant specimens for deposit as herbarium vouchers.

Module 3: Herbarium processing methodology, records keeping, maintenance of herbarium, virtual herbarium (10hrs)

Field work and selection of material, processing of plant specimen like collection, drying of sample, poisoning of sample, mounting of sample, stitching and labelling sample, deposition of plant sample, maintenance and specimen care of herbarium from insects & pest with repellents and fumigation use, virtual herbarium & its advantages.

Module 4: Basic botanical and practical skills (8hrs)

Initial preparations, obtain collection permit, establish official contacts, arrangement with herbarium to deposit a specimen, assess field equipment's and supplies, pressing and mounting specimen techniques like spatula & needle method, proper labelling, storage, record keeping & conservation of specimens

Outcomes:

1. The herbarium is used as a repository for the study of plants specimen. Herbarium provides instant referrals in taxonomical studies. They give histological and geographical information about different plant species.
2. It provides detailed scientific information about the plants for research and exhibition and thus acts as a quick referral system in taxonomic studies.
3. A herbarium provides information about the distribution and occurrences of certain plant species. Herbaria provides scientific information about the plants.
