Value Added Course

Title of the Value Added Course:

Preparation of Herbarium Sheet and authentication of plant

Objectives of the Practice:

No university a part of curriculum can adequately cover all areas of importance or relevance. It is important for higher education institutions to supplement the curriculum to make students better prepared to meet industry demands as well as develop their own interests and aptitudes. Our college offers a wide variety of short term and also long-term certificate course which are conducted after class hours or during semester breaks. These courses are conducted by relevant subject teachers which help students stand apart from the rest in the job market by adding further value to their carriers. To learn Organizational structure and industry expectations as fresher's

- To develop strong foundation in fundamental science for scientific understanding.
- A holistic development of academic excellence to contribute effectively to the understanding of plant sciences.
- To equip the students with the basic skills in identifying and labelling different plants.
- To impart quality education in the field of Pharmacognosy enabling our students to confidently face the job market.
- To sensitize the students towards the need for keeping the environment clean and conserve our natural resources.

PRINCIPAL

Ashokrao Mane College of Pharmacy

- Understand the universal nature of science and demonstrate the scientific method.
- To lay a strong foundation to the study in Pharmacognosy and Phytochemistry and impart in sight in to be different types of medicinal plants, its classification in the living kingdom.
- Appreciate the world of organisms and its course of evaluation and diversity & develop basic skills to study pharmacognosy in detail.
- To develop skill in practical work, experiment use of biological tools and techniques.
- To develop problem solving skills in the students to carry out innovative research projects and creation of spirit of knowledge in them.
- Proficiency in the use of recent and advance botanical or herbal technologies.
- Awareness to explore the student's different life forms of organisms at cellular, molecular and nano level and inspire to disseminate the concept of biodiversity conservation.
- To provide facilities for determination of any material including new taxa and to enable preparation of new monographs and floras.
- To assemble data for working out ranges and ecological distribution.
- To provide material for specific research as in plant anatomy, palynology and ethno botany and also for molecular research.
- To preserve specimens of historic importance and to assemble data for working out ranges and ecological distribution.

Outcomes:

1. The herbarium is used as a repository for the study of plants specimen. Herbarium provides instant referrals in taxonomical studies. They give histological and geographical information about different plant species.
2. It provides detailed scientific information about the plants for research and exhibition and thus acts as a quick referral system in taxonomic studies.
3. A herbarium provides information about the distribution and occurrences of certain plant species. Herbaria provides scientific information about the plants

Value Added Course

Title of the Value Added Course: PATHOLOGY LABORATORY WORK PRACTICE

Objectives of the Practice

- 1) Knowledge of mechanisms of disease including the etiology, local or systemic responses to disease.
- 2) To develop professional and administrative skills required of effective clinical pathology.

To gain experience in various aspects of pathology laboratory work practice.

- To fulfill the gap between theory and practical knowledge.
- Students are able to study the causes and effects of disease or injury.
- Study of the mechanisms of disease that lead to the signs and symptoms that must be recognized in patients
- Students are able to understand the processes involved in testing for disease and the reporting of diagnostic tests.

The Context: The reports are done by the students. The report includes,

1) Detail Of Training

- Basic Laboratory equipments and machinery
- Principle and procedure
- Solutions and reagents used in lab

- Methods of withdrawing blood
- Appropriate location site for obtaining blood sample
- Labeling of sample
- Updating patient records
- Maintaining of equipments and quality control
- Guidelines for Good Clinical Laboratory practice
- Disposable of wastes

2) List of Tests carried out in Laboratory

- Total CBC
- Routine Urine Analysis
- Renal function test
- Chemical test in renal disease
- Gastric function test
- Liver function test
- Cardiac profile test
- Staining methods and Aseptic techniques
- Study of gram positive and gram negative bacteria
- Identification of bacteria
- Routine coagulation test
- Hematological test

- Blood banking techniques and transfusion methods
- Blood group detection methods
- Techniques used for separation of blood composition
- Record keeping and documentation
- Diagnosis of disease

The Practice: Students should practice in nearby pathology laboratory for a period of not less than 30 hours done after the college working hours during II semester of B. Pharmacy. The reports are prepared by the students. The report includes the details about the practice.

Learning Outcome-

- 1) Students are able to study the causes and effects of disease or injury.
- 2) Understanding the mechanisms of disease that lead to the signs and symptoms that must be recognized in patients
- 3) Understanding the cause of disease, the processes involved in testing for disease and the reporting of diagnostic tests.

- **Dispensing**: Dispensing refers to the process of preparing and giving medicine to a named person on the basis of a prescription. Prescription includes following steps-
 - 1) Receive and validates the prescription.
 - 2) Understand and interpret the prescription.
 - 3) Select and label medicine for issue.
 - 4) Make a final check.
 - 5) Record the action taken.
 - 6) Issue medicines to the patient with clear instruction and advice.
- **Inventory control of medicines**: Receive and inspect products. The first step in the inventory management process includes
 - 1) Receiving your order from the supplier
 - 2) Sort and stock products.
 - 3) Accept customer order.
 - 4) Fulfill, package and ship order.
 - 5) Reorder new stock.
- **Purchase, sale of medicines and Accounting**: Purchase includes,
 - 1) Identification of the need
 - 2) The description of the product characteristics
 - 3) Drafting the specifications
 - 4) Supplier sourcing
 - 5) In-depth analysis of applications
 - 6) Preparing for the negotiation

Sale includes,

 - 1) Receive Mail Order
 - 2) Details Verification
 - 3) Data Conversion Entry

Value Added Course

Title of the Value Added Course:

Preparation of Herbarium Sheet and authentication of plant

Objectives of the Practice:

No university a part of curriculum can adequately cover all areas of importance or relevance. It is important for higher education institutions to supplement the curriculum to make students better prepared to meet industry demands as well as develop their own interests and aptitudes. Our college offers a wide variety of short term and also long-term certificate course which are conducted after class hours or during semester breaks. These courses are conducted by relevant subject teachers which help students stand apart from the rest in the job market by adding further value to their carriers. To learn Organizational structure and industry expectations as fresher's

- To develop strong foundation in fundamental science for scientific understanding.
- A holistic development of academic excellence to contribute effectively to the understanding of plant sciences.
- To equip the students with the basic skills in identifying and labelling different plants.
- To impart quality education in the field of Pharmacognosy enabling our students to confidently face the job market.
- To sensitize the students towards the need for keeping the environment clean and conserve our natural resources.

- Understand the universal nature of science and demonstrate the use of scientific method.
- To lay a strong foundation to the study in Pharmacognosy and Phytochemistry and impart in sight in to be different types of medicinal plants, its classification in the living kingdom.
- Appreciate the world of organisms and its course of evaluation and diversity & develop basic skills to study pharmacognosy in detail.
- To develop skill in practical work, experiment use of biological tools and techniques.
- To develop problem solving skills in the students to carry out innovative research projects and creation of spirit of knowledge in them.
- Proficiency in the use of recent and advance botanical or herbal technologies.
- Awareness to explore the student's different life forms of organisms at cellular, molecular and nano level and inspire to disseminate the concept of biodiversity conservation.
- To provide facilities for determination of any material including new taxa and to enable preparation of new monographs and floras.
- To assemble data for working out ranges and ecological distribution.
- To provide material for specific research as in plant anatomy, palynology and ethno botany and also for molecular research.
- To preserve specimens of historic importance and to assemble data for working out ranges and ecological distribution.

**New Hire Training/ Personality Development/ Employability Skills**

Sr. No.	Topic	Methodology	Learning Objectives	Duration
1	Expectation setting	Role play	To learn Industry expectations from freshers	1
2	Ice breaking	Introduction	To know more about the trainer & candidates	1
3	Organizational Structure	Case study	To learn Organizational structure	2
4	SWOT Analysis	Free speech	To identify their Strength/Weakness/Opportunities/ Threat	3
5	Corporate Jargons	Presentation	To learn most commonly used words in corporates	2
6	Public Speaking	Extempore	To eliminate stage fear	3
7	Presentation Skills	Power Point presentation	To articulate your thoughts through Power point presentation	4
8	E-mail Etiquette	Presentation/Mock E-mails	To learn E-mail writing skills	2
9	Grooming	Presentation/Do's & Don'ts/Role play	Dress to impress/ Proximity/ Personal hygiene/	3
10	Body language	Role play	To learn positive body language	1
11	Telephone Etiquette	Role play/Mock Calls	To handle telephonic round of interview/ To learn call mechanics	2
12	Group Discussion	Group activity	To assess candidates' public speaking skills	2
13	Personal Interview	Mock Interviews	To perform well during interviews	4
				30 hrs.

Outcomes:

- Students know Organizational structure and industry expectations as freshers.
- Students identified their Strength/Weakness/Opportunities/ Threat.
- Students learned most commonly used words in corporates and E-mail writing skills
