(57) Abstract :  
The present invention relates to polyherbal syrup for diabetes mellitus and process for preparation thereof. Further invention relates to formulate herbal syrup formulations comprising crude extract of fenugreek seeds, basil leave, Karela, Paneer phool, Lemon and Honey with or without other pharmaceutical acceptable excipients in order to obtain antidiabetic formulations with more effective oral hypoglycemic activity, less side effects, increased patient compliance thereby providing multifaceted benefits. The formulation of the present invention not only efficiently controls the Type 2 diabetes but also offers reversal possibilities in pre-diabetes and thereby a possible preventive option for Type 2 diabetes mellitus and the associated complications.

(57) Abstract :  
 The present invention relates to Pisidium Gujava plant extract useful for the anti-urolithiasis activity. Further invention relates to process for preparation of Pisidium Gujava plant extract. The present invention relates to isolate and characterize the chemical component from Pisidium Gujava plant extract by using chromatographic methods. Another invention relates to methoanol, acetone and ethyl acetate extract screen for anti-urolithiasis activity. Methanol extract showed good activityfor Anti Urolithiasis. The extract acetone and ethyl acetate showed moderate activity as compared to standard drug Cyston Tablet.

(57) Abstract

The present invention relates to gallic acid nanoparticles for anticancer use. It employed GMD, Poloxamer 188, and Eudragit S 100 in this invention to formulate and characterize gallic acid nanoparticles using the probe sonicator technique. The nanoparticles are characterized using particle size, zeta potential, DSC, XRD, entrapment efficiency, loading content, and an in-vitro release study. With an average size of 151.2±0.21 nm and a zeta potential of +18.2 mV, gallic acid is encapsulated to roughly 78.80%. The total in-vitro drug release is 79.16% after 12 hours. Based on our findings, it concluded that our efforts will aid in the design and manufacture of gallic acid nanoparticles for the artemia salina brine shrimp bioassay, where cytotoxicity is evaluated using the LC50 method (lethality concentration). The herbal nanoformulation of gallic acid loaded nanoparticles is found to be effective against brine shrimp. It is discovered that nanoformulation of bioactive component gallic acid that could account for its pharmacological effects.

(57) Abstract :  
 The present invention relates to asolid lipid nanoparticles composition comprising quinine sulphate and other pharmaceutical acceptable excipients for antifungal use. Using a probe sonicator, Chitosan, Glyceryl Monooleate (GMO), and poloxamer 407 are used to make nanoparticles. It has an encapsulation rate of 80.82%, an average particle size of 147.9±0.69 nm, and a zeta potential of +22.3 mV. The cumulative in-vitro drug release up to 12 hours is 90.42%, indicating that chitosan nanoparticles are provide sustained release pattern at different pH levels. As a result, the formulation and development of Chitosan/GMO loaded quinine sulphate nanoparticles are described in this work, as well as their antifungal effectiveness against Candida albicans. This invention reported Minium Inhibitory Concentrations (MICs) for C. albicans identified with higher MICs for nanoformulation than cinchona extract.

(57) Abstract :  
 The present invention relates to quercetin Eudragit S100/GMO nanoparticles for in-vitro antidiabetic activity by glucose uptake method. Quercetin is an active formulated into nano formulation to improve its water solubility and better in-vitro antidiabetic activity. Using a probe sonicator, nanoparticles are made using Eudragit S100, Glyceryl Monooleate (GMO), and poloxamer 188. They show approximately 78.82% encapsulation with an average size of 161.3±0.66 nm, and zeta potential +24.5Mv. The cumulative in-vitro drug releases up to 12 hours is 90.12%, indicating that quercetin loaded Eudragit S100 nanoparticles are effective for glucose absorption. The presence of active chemicals in the formulation of quercetin-loaded Eudragit S100 nanoparticles is responsible for greater antidiabetic efficacy by blocking carbohydrate-digesting enzymes with increased glucose absorption. As a result, it has the potential to minimize postprandial hyperglycemia and, if the dosing regime is determined, it could be utilized to treat type 2 diabetes

(57) Abstract  
 The present invention relates to polymeric rutin nanoparticles formulated by using rutin which is isolated from orange fruit peel extract. It targeted on extracting, separating, preparing, characterizing and subsequently evaluating rutin loaded Chitosan/GMO nanoparticles by protein denaturation method for in-vitro anti-inflammatory activity. Rutin is a biomolecule that can be obtained by using plant orange fruit peels, separated utilizing column chromatographic technique, and formulated into nano formulation to enhance its aqueous solubility. Particle size, Entrapment efficiency, Zeta potential, X-ray diffraction (XRD), Differential Scanning Calorimetry (DSC), and in-vitro release are studied to characterize nanoparticles. The average particle size of 145.5±0.260 nm and zeta potential of +28.6 mV, they showed approximately 81.82% encapsulation efficiency with cumulative drug release at 12 hour is 88.12%. The synthesized nanoformulation and extract showed in-vitro anti-inflammatory activity by protein denaturation method is found to be 57.2% & 71.42% respectively. This invention relates to exhibit that the orange peel fruit containing rutin bioactive compound and recommended as pharmaceutical importance for anti-inflammatory use

(57) Abstract :  
 The present invention relates to synthesize Curcumin loaded 5 Chitosan/GMO Nanoparticles (Cu-loaded chitosan nanoparticles) for controlled release in order to target anti-inflammatory activity via protein denaturation. The probe sonicator method is used to make nanoparticles out the of chitosan, Glyceryl Monooleate, and poloxamer 407. Nanoparticles are analyzed using particle size, zeta potential, 10 Differential Scanning Colorimetry, X-ray diffraction, entrapment efficiency, loading content, and in-vitro release. Based on the present invention, it believe that this invention allowed to develop and manufacture nanoparticles for the safety and longterm release of curcumin biomolecules, specifically for anti-inflammatory activity by protein denaturation. The materials used for the preparation has a big impact upon 15 how Chitosan/GMO nanoparticles loaded with curcumin release at different pH levels.

(57) Abstract :  
 The present invention relates to cinnamic acid nanoparticles using the Chitosan/GMO system for antidiabetic use. Further invention relates to solid lipid nanoparticles composition comprising cinnamic acid and other pharmaceutical acceptable excipients. Using a probe sonicator approach, chitosan, Glyceryl Monooleate (GMO), and poloxamer 407 are also employed to manufacture nanoparticles. Nanoparticles are evaluated using particle size, zeta potential, Differential Scanning Colorimetry (DSC), X-ray diffraction (XRD), entrapment efficiency, loading content, and in-vitro release. They demonstrated around 80.82 % encapsulation with an average size of 172.2±66 nm and a zeta potential of +31.0 mV. Up to 12 hours, the cumulative in vitro drug release is 77.16 %. Based on the present invention findings, it concluded that the present invention will make it easier to develop and manufacture nanoparticle in cinnamic acid biomolecule preservation and long-term release. The materials employed in the preparation has a big influence on how well Chitosan-GMO nanoparticles loaded with cinnamic acid released at different pH levels.

Sir/Madam,

Welcome to RGNIPM Nagpur, Ministry of Commerce & Industry Government of India Training Institute. We can conduct the IPR program in association with RGNIPM with your organisation National Intellectual Property Awareness Mission (NIPAM).

You are requested to send an invitation letter on letterhead to Head, RGNIPM, Nagpur & scan copy can be sent over the above E-mail. (Please don't send letter again if it was already sent over email on any other coordinator name. No personal invitation in the name of speaker will be required).

You are requested to fill the form to get various details and after filling form kindly send email to speaker and give copy to sarang.patil@nic.in  
<https://forms.gle/LDo1MBmJEyNTE3T9>

Topic of programme:- Intellectual Property Rights- Patents and Designs filing

Organizer:- RGNIPM, Govt. of India & your organization can jointly organize (Joint free online program)

Duration & Mode of program:-said online program will be around **one hour duration**

**Date & Time of online program:** 3 March 2023, 12.30 pm-1.30 pm/will be as per mutual discussions

Who can attend : Any students of undergraduate, PG, etc., faculty etc. can attend

**Speaker from RGNIPM:** Mrs Pooja Vishal Maulikar, Examiner of Patents and Designs / you may discuss with the speaker on the office phone. (Speaker name may vary depending on the urgent/unforeseen situations/medical reasons)

For further coordination you can contact to above speaker only.

**Whatsapp & Mobile of Speaker** (contact during 11 Am to 5 Pm during – Monday to Friday)

Mrs Pooja Vishal Maulikar - 7720000484, **Landline:** 0712-2540920, Email: poojavm.ipo@gov.in

( In case above number is busy then for urgent matters you can call other NIPAM officer to give message on 09892605892 or 09224425777 or 9165637706

**Online Link :** Our Institute/office can arrange an online CISCO Webex link in which you can nominate 200 to 1000 participants OR as per your convenience you can also arrange the online link . However, if you want a link from our end kindly communicate immediately over above speaker Email.

**Flyer/Banner:** Draft of virtual flyer/banner is given in page 3 (you can change as per your requirement). You are requested to give copy of virtual banner/flyer to speaker email/whatsapp number as given above.

**Use of Name/Logo/ Government emblem:-** You can use the proper Government emblem (please place at top & at centre of banner/flyer), NIPAM logo (as per page 3) & you can use the word "In association with RGNIPM" for this said program for around one session. Further you can mention program is under National Intellectual Property Awareness Mission (NIPAM).

**Media / newspaper Publicity-** You are requested to give wide publicity in all newspapers, print & online media. You are requested to give copy of such publications to speaker over email or whatsapp mobile as given above.

**Feedback link for certificate generation-** The above speaker will send feedback link to you before program starts

**Feedback letter:** - You are requested to share the signed copy of feedback letter from authorised person from your organization on cover letter to the above speaker email.

**Certificate:** E- certificate (with Government emblem) will be given to all participants who attend programme & who fill the feedback form (you can see below sample certificate on page 4). If certificates not received then contact to Mr Patil - 9922453057; sarang.patil@nic.in

**Appreciation letter/ Certificate to organization & Convenor/coordinator**

[Back to Index](#)

Appreciation Certificate will be given to the Institute/organization (format is given on page 4) for conduction of said program. Further if coordinator will try to arrange more than 200 participants for said program and after the submission of documents as mentioned below, certificate will be given to the Convenor/coordinators. If certificates not received then contact to Mr Patil - 9922453057

**Online Video:** After the program is over, you should delete the video from any other online portals in a day.

**Disclaimer:** No part of material/PPT/video shall be reproduced or copied or shared in any form or by any means without the written permission from RGNIIPM. The matter presented during the program is not an exact reproduction of the Act and Rules or any orders of Government. This PPT shown, discussions during the program are introductory in nature and should not be produced as a matter of evidence or authenticity in any court of Law or anywhere. This department/Institute is not responsible for the result of any action taken neither on the basis of any material nor for any errors or omission. Suggestions for improvement of this material/PPT will be gratefully accepted.

**Updates on Social Media:** This is to inform you that IPR awareness is very less in India and very few persons know about IPR. Hence RGNIIPM has decided to give updates and open a Facebook page & Twitter in which updated information related to IPR training, important IPR updates, IP process, materials, etc. are posted regularly. You are requested to encourage your officials, faculty, and students to join us to get various updates. Links for joining social media are as under:-
