

2.3

TEACHING LEARNING PROCESS

CONTENT

2.3.1

Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences and teachers use ICT- enabled tools including online resources for effective teaching and learning process

STUDENT CENTRIC METHODS

Shri. Balasaheb Mane Shikshan Prasarak Mandal, Ambap's
ASHOKRAO MANE COLLEGE OF PHARMACY

Approved by PCI & AICTE New Delhi, DTE-Government of Maharashtra,
Affiliated to Shivaji University, Kolhapur

Estd. 2006 | Founder President: LATE SHRI. ASHOKRAO MANE
Principal: DR. S.V. PATIL | President: SHRI. VIJAYSINH MANE

Peth Vadgaon Tal. Hatkanangale, Dist. Kolhapur (MH) PIN 416 112
Web: www.amcoph.org | Phone: 0230-2471360 / 61 | E mail: copbpharm@gmail.com

Criteria 2- Teaching- Learning and Evaluation

Key Indicator- 2.3. Teaching-Learning Process

Metric No.	
2.3.1. Q1M	<p>Student-centric methods, such as experiential learning, participative learning and problem-solving methodologies are used for enhancing learning experiences using ICT tools</p> <p>These methods focus on the student's active participation and engagement in the learning process, allowing them to gain knowledge and skills through the various student-centric learning methods.</p> <p>The following student-centric methods are used to enhance the teaching-learning process:</p> <p>Experiential Learning:</p> <p>Experiential learning is a method where students learn through direct experience and reflection. This approach allows students to apply theoretical concepts to real-life situations, making the learning process more meaningful and relevant.</p> <p>The institute provides facilities to students, to have experience and learn from it. Industrial Visits are arranged to get the experience of industrial culture and environment and also to learn about the transformation of academic knowledge and skill into industrial perspectives. Industrial training is arranged to have hands-on experience in handling various industrial processes of manufacturing and analysis of drugs. In addition to this study tours at various research labs, medicinal gardens, etc. In the curriculum, students are exposed to perform experiments/practical's in the laboratory to develop practical skills required to meet industry and community needs.</p> <p>Participative Learning:</p> <p>Participative learning involves the active participation of the student in the learning</p>

process through group discussions, seminars, and other collaborative activities. This approach encourages students to share their ideas and perspectives, promoting critical thinking and creativity. Institute provides a platform to students for participative learning which builds confidence and a level of understanding in the various activities like Quiz, Group discussions, Flipped Classroom, and Seminars by which students get participated and enhance their knowledge.

Problem-solving methods:

Problem-solving methodologies involve students working on complex problems or projects that require them to apply their knowledge and skills in a practical context. This approach helps students develop their problem-solving skills and promotes a deeper understanding of the subject matter. To inculcate and enhance problem-solving ability, students are provided with assignments, practice school, and research projects, under the guidance of experts from various domains of pharmaceutical sciences.

ICT tools can facilitate these methods by providing a rich and interactive learning environment that promotes critical thinking, creativity, and collaboration. Teachers are encouraged to use ICT tools for effective teaching-learning. Especially use of audio, and visual tools like PowerPoint presentations, YouTube videos, Slideshare, and blogs are being implemented to enhance the learning experience. E-Learning consists of the interaction between students and interactive e-learning platforms, identifying online resources for self-learning like Google form, Google Classroom, Quizzes, VMedulife Learning management system (LMS) materials, Webinars, sources through CDs and DVDs, Wi-Fi facility to access technical resources such as DELNET, SWAYAM, NPTEL Lectures, and videos, etc. ICT tools such as smartboards, online collaboration platforms (Kahoot, Quizizz), and educational software (ChemSketch, PyRx, Design Expert) can facilitate these methods by providing a rich and interactive learning environment in a fun and engaging way.

Experiment No. 01

01

Aim: To perform preliminary phytochemical screening of crude drugs

Objectives:

1. To develop the ability to identify phytoconstituents present in crude drug using preliminary phytochemical screening.

Requirements:

Apparatus: Test tube, test tube stand, test tube holder, water bath, filter paper, pipette, gas burner

Chemicals: Hydrochloric acid, Dragendorff's reagent, Mayer's reagent, Wagner's reagent, Hager's reagent, tannic acid, H_2SO_4 , chloroform, ammonia, FeCl, acetic acid, sodium hydroxide, sodium picrate, acetic anhydride, lead acetate solution, 1% gelatin solution, sodium chloride

Crude Drug: Extract of crude drugs. (Vinca)

► Introduction:

Phytochemical screening is done to identify the nature and type of constituents present in a drug. This technique is of extreme help when a new drug is being investigated for the chemical constituents. In phytochemical screening there are both general and specific tests for finding the nature of chemical constituents in the drug.

Phytochemical screening means investigation and identification of the medicinally active substances present in plants. Phytochemical screening is done to identify the nature and type of constituents present in a drug. It involves the isolation of active constituents and to identify them qualitatively.

[BACK TO INDEX](#)

03

Qualitative Preliminary Phytochemical Screening:

Phytochemical examinations were carried out for all the extracts as per the standard methods.

I. Detection of Alkaloids:

Extract is dissolved in dilute Hydrochloric acid and filtered. This filtrate is then used for testing alkaloids with following reagents:

Sr. No.	Chemical Test	Observation	Inference
1.	<u>Dragendorff's test:</u> Filtrate is treated with Dragendorff reagent	Formation of reddish brown coloured precipitate	Alkaloid is present
2.	<u>Mayer's test:</u> Filtrate is treated with Mayer's reagent (Potassium Mercuric Iodide)	Formation of cream coloured precipitate	Alkaloid is present
3.	<u>Wagner's test:</u> Filtrate is treated with Wagner's reagent (Iodine in Potassium iodide)	Formation of reddish brown precipitate	Alkaloid is present

[Signature]
PRINCIPAL
Ashokrao Mane College of Pharmacy

[BACK TO INDEX](#)

04

4.	<u>Hager's test:</u> Filtrate is treated with Hager's reagent (saturated picric acid solution)	Formation of yellow precipitate	Alkaloid is present
5.	<u>Tannic acid test:</u> Filtrate is treated with tannic acid	Formation of buff colored precipitate	Alkaloid is present.

II. Detection of Glycosides:

a) Chemical test for anthraquinone glycosides:

1.	<u>Brontrager's test:</u> Extract + 1 ml H ₂ SO ₄ . filter the solution and add chloroform	No rose pink color is appear.	Glycoside is absent.
2.	<u>Modified Brontrager's test:</u> Extract + H ₂ SO ₄ + FeCl ₃ & mix is boiled. Filter the solution & add chloroform	No pink colour is appear	Glycoside is absent.

[Signature]
PRINCIPAL
Ashokrao Mane College of Pharmacy
Peth Vadgaon.

[BACK TO INDEX](#)

05

b) Chemical test for cardiac glycosides:

1. Keller - Killani test:

Drug is extracted with chloroform & then 0.4ml acetic acid is added then along with FeCl ₃ then add H ₂ SO ₄ .	No purple color is appear	Glycoside is absent
---	---------------------------	---------------------

2. Legal test:

Extract is treated with sodium nitroprusside in pyridine & NaOH	No blood red color is appear	Glycoside is absent.
---	------------------------------	----------------------

c) Chemical test for cyanogenetic glycoside

1. Sodium picrate test:

Extract + H ₂ SO ₄ + sodium picrate	No red colour is produced	Glycoside is absent.
---	---------------------------	----------------------

d) Chemical test of saponins glycoside:

1. Foam Test:

0.5 gm extract + 2ml of water.	No foam is produced.	Glycoside is absent.
--------------------------------	----------------------	----------------------

 Ashokrao Mane College of Pharmacy

[BACK TO INDEX](#)

06

III) Detection of Steroids and Triterpenoids:

1. Lieberman-Burchard test:

Extract + chloroform the filtered. The filtrate is treated with acetic anhydride, boiled and cooled + Conc. H ₂ SO ₄	No formation of brown ring at the junction	Phytosterols are absent.
--	---	--------------------------------

2. Salkowski test:

Extract + chloroform & filtered then filtrate + conc. H ₂ SO ₄	No appearance of golden yellow colour	Triterpene is absent.
--	---	--------------------------

IV) Detection of Phenolic compounds:

a) Chemical tests for tannins:

1. Ferric Chloride Test:

Extract + 3-4 drops of Ferric chloride sol ⁿ	No formation of bluish black color.	tannin is absent.
--	---	----------------------

2. Lead Acetate test:

Extract + Lead acetate solution	No white ppt.	tannin is absent
------------------------------------	---------------	---------------------

[Signature]

07

3.	<u>Gelatin Solution test:</u> Extract + 1% gelatin soln containing NaCl	No white ppt.	tannin is absent.
4.	<u>Bromine water test:</u> Bromine solution is added to the test filtrate	No decoloriza- -tion of bromine	tannin is absent.

b) Tests for flavonoids:

1.	<u>Shinoda Test:</u> Extract + conc. HCl + 0.5 g of magnesium turnings	No pink colour appears	Flavonoid is absent.
2.	<u>Lead Acetate Test:</u> Extract + lead acetate solution	No yellow colour ppt.	Flavonoid is absent
3.	<u>Sodium Hydroxide Test:</u> Extract + NaOH solution	No yellow colour appears	Flavonoid is absent.

V. Detection of Carbohydrate :-

1. Molisch's Test :

Filtrate + 2 drops of alcoholic α -naphthol sol ⁿ	No formation of violet ring at junction	Carbohydrate is absent.
---	---	-------------------------

2. Benedict's test:

Filtrate + Benedict reagent heat gently	No orange red ppt.	Carbohydrate is absent.
---	--------------------	-------------------------

3. Fehling's test:

Filtrate + dil. HCl neutralized with alkali & heated with Fehlings A & B sol ⁿ	No red ppt.	Carbohydrate is absent.
---	-------------	-------------------------

VI. Detection of Protein :-

1. Xanthoprotic test:

Extract + conc. HNO ₃	No yellow colour appear.	Protein is absent.

Experiment No - 1

Aim - To study microscope & general techniques

Microscope may be defined as an optical instrument comprising of lens or combination of lenses which enables to view magnified images of minute objects.

* Compound microscope →

There are various parts of compound microscope as follows -

- 1) Eyepiece -
To observe magnified real image.
- 2) Together Objective -
Together the light rays coming from objective to white light rays of point of image to form real images magnified of the object.
Each objective is provided with colour code for this identification.
- 3) Condenser -
To condense light rays coming from mirror to slide.

PRINCIPAL
Ashokrao Mane College of Pharmacy,
Peth-Vadgaon, Dist. Kolhapur

Mirror - Act as light source

Body tube -

To hold eye piece at top level and nose piece at bottom level

Stage -

To hold the object on slide.

Mechanical stage -

It provide smooth and better control to the slide during mounting.

Handle / Arm -

To hold the microscope in proper position

Indication Joint -

This helps to incline the microscope to avoid strain in neck and back

Knob -

for vertical movement of condenser

D. S. ...
PRINCIPAL

Ashokrao Mane College of Pharmacy,
Peth Vadgaon, Dist. Kolhapur.

* Standard observation procedure of microscope -

- 1] Make sure objective and eyepiece are clean adjust mirror by selecting proper surface.
- 2] Adjust condenser to be raised high if sample is darkly stained.
Condenser should be relatively high.
- 3] Keep object in proper position on stage.
- 4] Select required objective then gradually lowers the body tube objective is almost touching to object or sample.
- 5] This adjustment is done with help coarse adjustment knob.

* Reference -

A handbook of human anatomy & physiology
S.B. Bhise, A.V. Yadav

* Report

The various parts of microscope has been studied, various basic techniques are also studied & reported.

**STUDY TOURS REPORT: S. G. PHYTOPHARMA PVT. LTD, KOLHAPUR**

Date: 26/05/2022

A REPORT ON ONE DAY STUDY TOUR**PLACE OF VISIT:**

S.G. Phyto Pharma Pvt.Ltd, B-53, Gokulshirgaon, Kolhapur.

Day & Date: 26th May 2022.

Ashokrao Mane College of Pharmacy, Peth-Vadgaon had arranged study tour for T.Y.B. Pharm and MPharm students has been successfully conducted on 26th May 2022.

This visit was mainly focused on to understand the procedures involved to develop the medicines from Phyton i.e. the plants ably supported and strengthened, by the processed minerals and the equipments used. Students were split into four groups. Mr. Avinash Tare explained about the facilities available inside the centre, their methods of collecting raw materials, the equipments used for the extraction and their storage and different unit. He also explained about the maintenance of the equipment and ethics considered during manufacturing and about regularity guidelines.

- Total 80 students (Mpharm & Bpharm) along with 05 staff members were present during visit.
- Mr. Satish Gune (Plant Head) greeted us with warm welcome note. He has given introduction of S.G Phyto Pharma group with profile, vision & popular products along with new sites.
- He told the expectations from students during interview, regarding basic knowledge of your area.
- Visit to Extraction, Production, compression, Quality Assurance, Packaging & storage department in four groups.

PRINCIPALAshokrao Mane College of Pharmacy
Peth-Vadgaon, Dist. Kolhapur.[BACK TO INDEX](#)

- Each leader from department given lot of respective information.
- Visit was concluded at 2:00 pm by presenting Institute brochure, & bouquet to Mr. Satish Gune and Mr. Avinash Tare.
- After that we visited at Panhala fort and organized lunch at Panhala fort for students and staff.
- Overall visit helped us in understanding Extraction Processes, formulation as well as packaging .Both UG as well as PG student's total of 80 students along with five faculty members visited.
- Visit was successfully organized with moral support and guidance of Management, Principal of Institute Dr. S. V. Patil sir & Academic Co-ordinator Dr. S. A. Bandgar sir.

STUDY TOURS REPORT: CHHATRAPATI SHIVAJI UNIVERSITY KOLHAPUR

Report of Field-Visit to Shivaji University, Kolhapur

Date of visit: Tuesday, 28 Feb.2023

Place of visit:

Chhatrapati Shivaji University Kolhapur

1. Dept. of Botany
2. Dept. of Chemistry
3. Dept. of Nanoscience & Nanotechnology

Coordinator: Department of Pharmacognosy

Faculty: Prof. U. S. Jadhav, Prof. Mrs. S. S. Suryawanshi

Coordinators from SUK- Dr. R.V. Gurav Dr. K. K Sharma, Dr. K. S. Sonawane

Participating student: Second Year B. Pharmacy

Objective of visit:

1. Conservation, study and propagation of rare plants.
2. Collection, documentation and maintenance of indigenous and exotic plant species.
3. Serve as a conservation and education center.
4. Acclimatization and field evaluation of indigenous & exotic plants from various agroclimatic regions.
5. Establishing herbarium of authentic specimen for identification of plants.
6. Sale and exchange of seeds, plants and other planting materials to individuals and research institution.
7. Provide recreation facilities to the public in general and exposing them to different hands-on learning.
8. To inculcate research competitive spirit among the students.

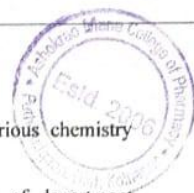

Summary Report:

On the occasion of National Science Day Ashokrao Mane College of Pharmacy, Peth Vadgaon organized a one -day field visit for S.Y.B. pharmacy students at intradepartmental of Shivaji University, Kolhapur dated on 28Feb.2023. The journey was started early morning at 9.00 am, teaching staff accompanying with students were Mr.U.S.Jadhav sir and Ms. S.S. Suryawanshi madam .The bus reached at university campus at time 10.30 a.m ,the visit was started with department of Botany where Dr.A.V.Gurav Head of Department welcomed the students and staff,after short interaction with staff the students were grouped in two batches and were taken for the botanical garden visit in campus, the botany dept. staff namely Ms.Jyoti Patil and Mr . Ashish Chavan guided students about botanical garden, the students were explored with many medicinal plant ,orchids plants, mountainous plants, fossil plant ,aromatic plants during this visit .The plant like *Costus igeus*,*Garcinia indica*,*Palm*,*Mucuna monosperma*,*Docynia indica*,*Ixora chinesis*,*Victoria Amazonica*, *Mappia foetida*,*Sarica indica* such plants ,habitat of plant,characteristics of plants were well explained by university staff.The plant scientific knowledge they shared about each and every plant was very informative. Students get thrilled after exposed by this flora which were well preserved and maintained in botanical garden. After garden visit students were taken to molecular biology and plant tissue culture department where they have explained working and mechanism of various lab. equipment like HPLC, UV, autoclaves etc., the plant tissue culture technique and their advantages, application were thoroughly discussed by staff. The visit was continued, the chemistry department

QUIZZ

IMA Quiz Contest
20 Questions

NAME :

CLASS :

DATE :

1. Gratings surface in the UV visible spectrophotometer is a polished surface of

- A silica
- B copper
- C nickel
- D alumina

2. Conjugation leads to:

- A bathochromic shift
- B hypsochromic shift
- C blue shift
- D red shift

3.  Which of the following type of electromagnetic radiation has the most energy?

- A infrared
- B radiowaves
- C ultraviolet
- D microwaves

4.  If an electron moves from n=4 to n=2 it ____

- A irregular behaviour
- B absorbs energy
- C None of the above
- D releases energy

5. In which of the following detector, discharged electrons are responsible for the excited hydrogen molecules which in turn cause emissions of U.V.

- A Mercury arc lamp
- B Hydrogen Discharge Lamp
- C Xenon Discharge Lamp
- D Tungsten Halogen lamp

6. Tungsten Filament heated at temperature to generate radiation.
- A 5000K B 3000K
 C 1000K D 2000K
7. Which of the following increase the fluorescence of aromatic compounds?
- A All are correct B Meta substitution
 C Para substitution D Ortho substitution
8. Which temperature (in degree Celsius) is required for Nernst Glower to produce IR radiation ?
- A 100-300 B 1330- 1200
 C 1000-1800 D 800- 900
9. A molecule has a very broadband at 3200cm^{-1} and a sharp band at 1711cm^{-1} . The molecule is most likely to be ...
- A alkenol B carboxylic acid
 C ester D amide
10. Flame photometer is quite similar to UV-Visible but what is the major difference between these 2 methods?
- A Monochomator B Detector
 C Data processor D Source of light
11. In Flame emission photometers, the measurement of _____ is used for quantitative analysis.
- A Velocity B Colour
 C Frequency D Intensity
12. Which of the following is not an application of Flame emission photometers?
- A Analysis of complex mixtures B Determination of metals such as Mn, Cu
 C Analysis of biological fluids D Determination of sodium, potassium in soil

13. The transformation of a liquid into spray of small droplets of aerosols is called _____
- A degradation process B nebulization process
- C sublimation process D activation process
14. Which of the following factors would not affect an R_f value?
- A time taken B paper used
- C temperature D solvent used
15. Chromatography separates the mixture of dyes on the basis of their _____
- A boiling point B gravity
- C solubility D density
16. A substance is soluble if it can be dissolved. In paper chromatography, the most soluble solute _____
- A travels furthest away from the start point B stays closest to the start point
- C can be found in the middle of the chromatogram D does not move from the start point
17. Ion-Exchange chromatography:
- A Also known as Liquid-Solid Chromatography B separate and analyze compounds that can be vaporized without decomposition
- C Separation based on partition coefficient between 2 immiscible liquids D Materials used are either cation or anion resins
18. To elute target proteins from an affinity chromatography matrix, which of the following conditions would be the most appropriate?
- A Adding a soluble ligand which competes with the affinity tagged protein for binding to the column B Low salt concentrations
- C Just keep washing buffer through the column, isocratic elution D High salt concentrations

Date: 22/12/2021 Time: 11:00 Am to 12:30 PM

Name of student: Jawahar Sayali

Topic of flipped classroom summary: Describe H₂ receptor antagonists.

The secretion of gastric acid occurs at the level of parietal cells of the oxyntic gland in the gastric mucosa producing 2-3 L of gastric juice per day, pH-1 in hydrochloric acid. Ultimately this secreting process occurs via an H⁺, K⁺ ATPase that exchanges hydronium ion (H₃O⁺) & uptake of potassium ion. The H₂ antihistamines are used in the treatment of duodenal ulcer, gastric ulcer, pathological hypersensitivity disorders, upper gastrointestinal bleeding. H₂ blockers are gr. of medicine that reduces the amount of acid produced by cells in stomach.

2.1.4 Seminars conducted

	Shri Balasaheb Mane Shikshan Prasarak Mandal, Ambap's ASHOKRAO MANE COLLEGE OF PHARMACY, PETH-VADGAON	
	Evaluation sheet for Class Seminar Academic Year: 2021-22	
	Class: Final Year B.Pharm Sem: VIII	Name of Faculty: N. R. Patel
	Subject: Pharmacy Practice	Course Code: BP_703T
Mark: 10	Date: 05/11/2022	

Date: 05/11/2022	Time: 10:00 am to 5:00 pm
Title: Discuss primary & secondary sources of drug information.	
Abstract: There are 3 types of source of drug information i.e Primary, Secondary and Tertiary. Primary sources provide upto date information on topic includes / forms the basis of all sources of information. Secondary sources provide quick access to primary literature. It refers to indexing and abstracting systems for easy retrieval of primary resources.

TITLE: ANTIBACTERIAL PRINCIPLES OF *SALACIA OBLONGA* WALL
EXTRACTS AGAINST DRUG RESISTANCE PATHOGENSABSTRACT

Salacia oblonga Wall containing vital phytoconstituents viz. mangiferin, salacinol, kotanolol etc has been in used since long in the treatment of diabetes, inflammation and burn wounds. The antimicrobial activity of *S. oblonga* aerial and root parts has been tested against drug resistant pathogens staphylococcus aureus, Pseudomonas aeruginosa and Klebsiella pneumoniae. Ethyl acetate extracts of *S. oblonga* parts have shown significant growth inhibition. Further the extract was fractionated by thin layer chromatography (TLC) and silica gel column chromatography. The active fractions from the chromatography displayed growth inhibition against drug resistant pathogens. Our study provides baseline information for the potential use of plant extracts to fight against drug resistant human pathogen.

TITLE: *IN SILICO* SCREENING OF PHYTOCHEMICALS IDENTIFIED FROM *ACACIA NILOTICA* BY GCMS METHOD FOR ITS ANTICANCER ACTIVITY

ABSTRACT

In present study the phytochemical analysis of the plant *Acacia nilotica* was done using GCMS method and seven compounds were identified as 3-picoline-2-nitro, 1-acetyl beta carboline, Hydroxy citronellal, Trans decalone, Propionic acid-2-chloro, ethyl ester, Lavandulyl acetate and D-Glucuronic acid. The anticancer activity of these seven compounds were analyzed with molecular docking study against the protein S-adenosyl-L-methionine decarboxylase which is found elevated in person with liver cancer. Among the seven phytochemicals identified, hydroxy citronellal followed by 1-Acetyl β carboline was observed to have maximum score with S-adenosyl-L-methionine decarboxylase in molecular docking study, Glucuronic acid scores maximum in number of Hydrogen bonds. And taking into consideration all the scoring parameters, Glucuronic acid is considered as the best fit. Further studies are needed for the isolation of this particular phytochemical and subject it to further cell line testing and animal testing for anticancer activity and can be processed to be an effective and cheaper drug due to higher biomass availability of *Acacia nilotica* plant.

Efficacy of the Novel Antidepressant Agomelatine on the Circadian Rest-Activity Cycle and Depressive and Anxiety Symptoms in Patients With Major Depressive Disorder: A Randomized, Double-Blind Comparison With Sertaline

ABSTRACT

Anxiety in major depression is associated with increased morbidity. The antidepressant, agomelatine, which acts as an agonist at melatonin MT1 and MT2 receptors and as an antagonist at serotonin 5-HT_{2C} receptors, has demonstrated efficacy and safety in both major depression and generalized anxiety disorder. Here, we investigated the efficacy of agomelatine in anxious depression. Outpatients with DSM-IV-TR-defined MDD received either agomelatine 25 to 50 mg (n = 154) or sertraline 50 to 100 mg (n = 159) during a 6-week, randomized, double-blind treatment period. The study was conducted from 2005 to 2006. The main outcome measure was the relative amplitude of the individual rest-activity cycles, expressed as change from baseline to week 6 and collected from continuous records using wrist actigraphy and sleep logs. Secondary outcome measures were sleep efficiency and sleep latency, both derived from actigraphy, and efficacy on depression symptoms.

PROJECT REPORT 2021-2022

Sr.no	Roll No	List of student undertaking project work	Title of Project Work	Guide Name
1	1	Vinita V. Aiman	Evaluation of Diclofenac Tablet by using Fenugreek husk Powder as a natural binder	Dr.S.V Patil
2	2	Simran Z. Beade	Formulation & Evaluation of Transdermal Patch Of Diclofenac sodium	Ms.S.S Suryawanshi
3	3	Amruta K. Beaklyte	Formulation & Evaluation of Transdermal Patch Of Diclofenac sodium	Ms.S.S Suryawanshi
4	4	Samath V. Benale	Formulation & Evaluation of Transdermal Patch Of Diclofenac sodium	Ms.S.S Suryawanshi
5	5	Krishnakant P. Bhatkande	Formulation & Evaluation of Transdermal Patch Of Diclofenac sodium	Ms.S.S Suryawanshi
6	6	Rohit S. Bhoite	Comparative study on synergistic action of green synthesized silver nanoparticles with aloevera	Ms.N.D Desai
7	7	Rushikesh R. Bhong	Comparative study on synergistic action of green synthesized silver nanoparticles with aloevera	Ms.N.D Desai
8	8	Rushikesh J. Bhosale	Comparative study on synergistic action of green synthesized silver nanoparticles with aloevera	Ms.N.D Desai
9	9	Rasika R. Bhoite	Comparative study on synergistic action of green synthesized silver nanoparticles with aloevera	Ms.N.D Desai
10	10	Sanchalini V. Chakradhari	IN Silico analysis of (1-(4-Fluorophenyl)-5-oxo-3-Phenyl-4,5-Dihydro-1H-Pyrazol-4-yl)methyl Ben	Dr.B.V. Udugade
11	11	Vijay P. Charate	Formulation and evaluation of Herbal face cream	Mr.V.R. Dhole
12	12	Harshad. H. Chavan	IN Silico analysis of [(1-(4-Fluorophenyl)-5-oxo-3-Phenyl-4,5-Dihydro-1H-Pyrazol-4-yl)methyl] Ben	Dr.B.V. Udugade
13	13	Harshvardhan .M. Chavan	Formulation & Evaluation of Herbal Face pack	Ms.A. V. Deshmukh
14	14	Rahul S. Chavan	Formulation and evaluation of Herbal face cream	Mr.V.R. Dhole
15	15	Shivani V. Choudhari	Evaluation of Diclofenac Tablet by using Fenugreek husk Powder as a natural binder	Dr.S.V. Patil
16	16	Amruta .B. Chougale	Evaluation of Diclofenac Tablet by using Fenugreek husk Powder as a natural binder	Dr.S.V. Patil
17	17	Arditi C. Chougale	Evaluation of Diclofenac Tablet by using Fenugreek husk Powder as a natural binder	Dr.S.V. Patil
18	18	Neha S. Chougale	Formulation and evaluation of Herbal face cream	Mr.V.R. Dhole
19	19	Jayal G. Dalhote	Formulation and evaluation of Anti-dandruff hair styling gel	Dr.A.P. Gadad
20	20	Vaishnavi A. Dalavi	Formulation and evaluation of Anti-dandruff hair styling gel	Dr.A.P. Gadad
21	21	Niyati .D. Dalvi	Formulation and evaluation of Herbal face cream	Mr.V.R. Dhole
22	22	Akash A. Desai	IN Silico analysis of (1-(4-Fluorophenyl)-5-oxo-3-Phenyl-4,5-Dihydro-1H-Pyrazol-4-yl)methyl Ben	Dr.B.V. Udugade
23	23	Dipvijay D. Devardekar	IN Silico analysis of (1-(4-Fluorophenyl)-5-oxo-3-Phenyl-4,5-Dihydro-1H-Pyrazol-4-yl)methyl Ben	Dr.B.V. Udugade
24	24	Pranjakta R. Dhanawade	Formulation and evaluation of herbal Syrup for treatment of Diabetes	Miss P.N. Chougale
25	25	Sakshi Sanjay Dornbe	IN Silico analysis of (1-(4-Fluorophenyl)-5-oxo-3-Phenyl-4,5-Dihydro-1H-Pyrazol-4-yl)methyl Ben	Dr.B.V. Udugade
26	26	Purvi A. Dangare	Review on Virtual Screening in drug design & Discovery	Mr.R.B. Ghotane
27	27	Rutuja S. Gadgil	Formulation and evaluation of Anti-dandruff hair styling gel	Dr.A.P. Gadad
28	28	Amasshiji J. Gaiwad	Review on Virtual Screening in drug design & Discovery	Mr.R.B. Ghotane
29	29	Pradip G. Gawakar	Review on Virtual Screening in drug design & Discovery	Mr.R.B. Ghotane
30	30	Bhagyashri Y. Gowde	Review on Pharmaceutical Waste Management	Mr.R.B. Ghotane
31	31	Nilam b. Gurav	Development and validation of U v Spectrophotometric method for the elermination of chlorprop	Dr.S.B. Sutar
32	32	Akanksha U. Ingawade	Development and validation of U v Spectrophotometric method for the elermination of chlorprop	Dr.S.B. Sutar
33	33	Shradha R. Ingawale	Formulation and evaluation of Anti-dandruff hair styling gel	Dr.A.P. Gadad
34	34	Omkar M. Ingawale	Comprative In-Vitro Evaluation of Different marketed Formualtion on of Telmisartan Tablets	Dr.S.A. Bandgar
35	35	Pratiksha B. Jadhav	Review on Pharmaceutical Waste Management	Mr.R.B. Ghotane
36	36	Rahul K. Jadhav	Development and validation of U v Spectrophotometric method for the elermination of chlorprop	Dr.S.B. Sutar
37	37	Ruturaj P. Jadhav	Comprative In-Vitro Evaluation of Different marketed Formualtion on of Telmisartan Tablets	Dr.S.A. Bandgar
38	38	Sanjana D. Jadhav	UV Visible spectroscopic method Development of Dexamethasone Drug	Mrs.S.V. Fawar
39	39	Shubhan G. Jadhav	Comprative In-Vitro Evaluation of Different marketed Formualtion on of Telmisartan Tablets	Dr.S.A. Bandgar
40	40	Sourabha N. Jadhav	UV Visible spectroscopic method Development of Dexamethasone Drug	Mrs.S.V. Fawar
41	41	Meera U. Kamble	Development and validation of U v Spectrophotometric method for the elermination of chlorprop	Dr.S.B. Sutar

PRINCIPAL
Ashokrao Mane College of Pharmacy

42	42	Sourabha S. Kamble	UV Visible spectroscopic method Development of Desamethasone Drug	Mrs.S.V. Fawar
43	43	Shrirang V. Khamate	Development and validation of U v Spectrophotometric method for the elermination of chlorprop	Dr.S.B. Sutar
44	44	Aniket A. Khot	study of NMR Spectroscopy with application	Mrs.S.V. Fawar
45	45	Mayuri .D. Kolekar	Formulation & Evaluation of Herbal Face Face Wash by using Fennel	Ms.A. V. Deshmukh
46	46	Omkar . Kolekar	Anlytical method development of Capceitabine dosage form by UV Spectrophotometric method	Mr.V.M. Patil
47	47	Aishwarya S. Koli	study of NMR Spectroscopy with application	Mrs.S.V. Fawar
48	48	Aniket S. Koli	Formulation and evaluation of Herbal Anti-acne cream using moring leaver	Miss P.N. Chougale
49	49	Yaash S. Koli	Anlytical method development of Capceitabine dosage form by UV Spectrophotometric method	Mr.V.M. Patil
50	50	Soukany S. Kore	Comprative In-Vitro Evaluation of Different marketed Formualtion on of Telmisartan Tablets	Dr.S.A. Bandgar
51	51	Shweta A. Kore	Formulation and Evaluation of herbal Massage night cream	Dr.P.S. Patil
52	52	Utkarsha M. Kothawale	Formulation and Evaluations of antianddruff shampoo using curry leaves and hibiscus flower	Miss P.N. Chougale
53	53	Sarswati K. Kumbhar	Anlytical method development of Capceitabine dosage form by UV Spectrophotometric method	Mr.V.M. Patil
54	54	Srushti P. Kumbhar	Formulation & Evaluation of Herbal Face Face Cream by using Fennel in Tretment of Acne	Ms.A. V. Deshmukh
55	55	Sakshi S. Kumbhar	Anlytical method development of Capceitabine dosage form by UV Spectrophotometric method	Mr.V.M. Patil
56	56	Ibrahim A. Kurane	study of NMR Spectroscopy with application	Mrs.S.V. Fawar
57	57	Shradha K. Lokare	Anlytical method development of Capceitabine dosage form by UV Spectrophotometric method	Mr.V.M. Patil
58	58	Aishwarya V. Magdum	Development and validation of U v method for estimation of antifungal drug Flucoazole	Mr. P. B. Patil
59	59	Shubhan S. Majgaonkam	Nutraceutical Impact on Chemoprophylaxis and Chemotherapy	Ms. P. S. Patil
60	60	Tejaswini S. Malekar	Formulation and evaluation of herbal face cream massage and Night cream	Dr.P.S. Patil
61	61	Sahmati R. Metkar	Nutraceutical Impact on Chemoprophylaxis and Chemotherapy	Ms. P. S. Patil
62	62	Supriya S. Mirajkar	Preparations and evaluation of herbal shampoo containing Black sesame Extract	Ms.A.P. Bhosale
63	63	Yogesh V. Misal	Preparations and evaluation of herbal shampoo containing Black sesame Extract	Ms.A.P. Bhosale
64	64	Shruti S. Mohite	Formulation and evaluation of herbal face cream massage and Night cream	Dr.P.S. Patil
65	65	Sapna V. More	Formulation and evaluation of herbal face cream massage and Night cream	Dr.P.S. Patil
66	66	Muaffar M. Mulla	Development and validation of U v method for estimation of antihypertensive drug telmisartan	Mr. P. B. Patil
67	67	Vasim M. Nadaf	India Trational System of Medicine	Ms. P. S. Patil
68	68	Rutuja V. Naikwade	Formulation and evaluation of Herbal hand wash gel containing essential oils	Miss M.V. Mane
69	69	Snehal S. Name	Preparations and evaluation of herbal shampoos containing Black sesame Extract	Ms.A.P. Bhosale
70	70	Shivani R. Nashte	Effect of binding on dissolution rate of diclofenac from compress tablet	Ms.S.N. Korpale
71	71	Komal D. Nigave	Development and validation of U v method for estimation of antifungal drug Flucoazole	Mr. P. B. Patil
72	72	Jyoti A. Parti	Formulation and evaluations of Multipurpose herbal cream	Miss P.N. Chougale
73	73	Akanksha N. Patane	Formulation and evaluation of Herbal hand wash gel containing essential oils	Miss M.V. Mane
74	74	Abhijit B. Patil	Effect of binding on dissolution rate of diclofenac from compress tablet	Ms.S.N. Korpale
75	75	Ankita A. Patil	Nutraceutical Impact on Chemoprophylaxis and Chemotherapy	Ms. P. S. Patil
76	76	Apurva P. Patil	Formulation & Evaluation of antibacterias and antifungal cream of garlic oil	Mr. A. P. Jadhav
77	77	Pankaj B. Patil	Development and validation of U v method for estimation of antifungal drug Flucoazole	Mr. P. B. Patil
78	78	Dipvijay P. Patil	Development and validation of U v method for estimation of antifungal drug Flucoazole	Mr. P. B. Patil
79	79	Kishor B. Patil	India Trational System of Medicine	Ms. P. S. Patil
80	80	Neha D. Patil	Formulation and evaluation of Polyherbal gel hand sanitizer	Mr. P. S. Kumbhar
81	81	Omkar R. Patil	Formulation and Standardization of Fermented Biomedicine as antioxidant	Mrs.P.P. Patil
82	82	Pradnya K. Patil	Formulation and Standardization of Fermented Biomedicine as antioxidant	Mrs.P.P. Patil
83	83	Pratiksha R. Patil	Effect of binding on dissolution rate of diclofenac from compress tablet	Ms.S.N. Korpale
84	84	Ranveer R. Patil	Formulation and Standardization of Fermented Biomedicine as antioxidant	Mrs.P.P. Patil
85	85	Rasika R. Patil	Formulation and Standardization of Fermented Biomedicine as antioxidant	Mrs.P.P. Patil

Investigation for Institutional Innovation and Incubation Cell

Write problem or challenges faced during project work/Case studies:

One of the important ingredients that may contribute to the health advantages is gallic acid (GA), a water-insoluble phenolic compound. However, GA's pharmacokinetic features, such as its big particle size, low absorption, poor solubility, low bioavailability, and rapid elimination, have a negative impact on its use by humans. As a result, gallic acid's application in various formulations to treat various diseases has significant limits; results have been disappointing since it is unstable at high temperatures.

Write the solution on problem or challenges faced during project work/Case studies:

Great efforts are being made in the current work to discover and develop nanoformulation based on natural products, as well as to evaluate their in-vitro cytotoxic impact on brine shrimp lethality assays. A delivery method of gallic acid loaded eudragit S 100 nanoparticles was created in our work to improve its efficiency. High solubility, higher stability, sharper size distribution, sustained and controlled release profiles, higher encapsulation efficiency for weakly water soluble agents, and can be effective in enhancing bioavailability with better targeting efficiency were all overcome by nanoparticle approaches like polymeric nanoparticles.

Investigation for Institutional Innovation and Incubation Cell

Write problem or challenges faced during project work/Case studies:

One of the important ingredients that may contribute to the health advantages is Quinine Sulphate, a water-insoluble alkaloid compound. However, Quinine Sulphate's pharmacokinetic features, such as its big particle size, low absorption, poor solubility, low bioavailability, and rapid elimination, have a negative impact on its use by humans. As a result, quinine sulphate's application in various formulations to treat various diseases has significant limits; results have been disappointing since it is unstable at high temperatures.

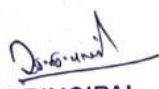

Write the solution on problem or challenges faced during project work/Case studies:

Great efforts are being made in the current work to discover and develop nanoformulation based on natural products, as well as to evaluate their in-vitro anti-fungal activity. A delivery method of quinine sulphate loaded chitosan nanoparticles was created in our work to improve its efficiency. High solubility, higher stability, sharper size distribution, sustained and controlled release profiles, higher encapsulation efficiency for weakly water soluble agents, and can be effective in enhancing bioavailability with better targeting efficiency were all overcome by nanoparticle approaches like alkaloid nanoparticles.

Project Report: Problem solving statement report 2021-22

Sr. No.	Name of Project Guide	Name of Student	Project title	Problem Statement	Solution Statement
01	Mrs. Poonam Nilesh Chougule	Mr. Aniket Ranjeet Koli	Formulation and Evaluation of Herbal Anti-acne cream using Moringa leaves.	In market, there are many synthetic formulations are available in treatment of acne. Lots of chemical are used to prepare Anti-acne cream which leads to harmful effects to the patients. Synthetic formulation contains various preservatives and ingredients to increase shelf life which affects health of patients. It has many side effects, adverse effects. It produce toxic effect such as skin irritation, skin rash.	To overcome the above mentioned side effects I prepared anti-acne cream by using herbal ingredients (Moringa leaves). Herbal anti-acne cream has following benefits - This does not show any side effects to the skin. It is compatible with skin. It is more affordable than conventional medicine. It is easily available. It is natural. Fewer side effects.
02		Ms. Utkarsha Maruti Kothawale	Formulation and Evaluation of Antidandruff shampoo using curry leaves and Hibiscus flower.	When I prepared herbal shampoo of curry leaves and hibiscus by using formulation table Quantity Ingredients Curry leaves extract Hibiscus extract Sodium lauryl sulphate Trichanolamine EDTA Methyl paraben Tween 80 Water Perfume In which there was absence of surfactant due to this consistency of shampoo becomes liquid by adding 3ml tri-ethanolamine preparation gave bad odour.	In order to overcome the side effects of shampoo I changed the formulation which is as follows 0.2g of sodium citrate to surfactant Ingredients Quantity Curry leaves extract Hibiscus Sodium lauryl sulphate (SLS) Sodium citrate Hydroxyethyl propyl methyl cellulose (HPMC K100) Glycerin Methyl paraben Propyl paraben Perfume Colour Purified water
03		Ms. Prajkata Ramesh Dhanawade	Formulation and Evaluation of Herbal syrup for Treatment of Diabetes.	In market, there are many synthetic formulations are available in treatment of diabetes. Lots of chemical are used to prepare syrup which leads to harmful effects to the patients. Synthetic formulation contains various preservatives and ingredients to increase shelf life which affects health of patients. It has many side effects, adverse effect like nauseous vit B12 deficiency, heart attack.	To overcome this problem we prepare herbal syrup formulation. Herbal formulation have following benefits: More affordable than conventional medicine. Easily available. It is natural. Fewer side effects. Cost effective. No harmful.
04		Ms. Jyoti Annaso Parit	Formulation and Evaluation of Multipurpose Herbal Cream	Write problem or challenges faced during project work/Case studies: While exposing the skin to the pollution skin has been associating with skin problems like premature aging, tanning etc. Also, the use of synthetic preparation for skin like creams, give some side effects like rashes, redness, peeling skin, swelling etc.	Write the solution on problem or challenges faced during project work/Case studies: To solve this problem we prepared a multipurpose herbal cream containing Tulsi, neem, sandalwood extract and fragrance. Herbal preparations have lesser side effects as compared to synthetic creams. Using the properties of herbs like anti-aging and tanning we can overcome the problems which are occurred due to pollution.

➤ Write problem or challenges faced during project work/Case studies:

When I prepared herbal shampoo of curry leaves and hibiscus by using formulation table

Ingredients	Quantity
Curry leaves extract	4ml
Hibiscus extract	4ml
Sodium lauryl sulphate	6g
Triethanolamine	3ml
EDTA	0.15g
Methyl paraben	0.2g
Tween 80	1ml
Water	q.s
Perfume	q.s

In which there was absence of surfactant due to this consistency of shampoo becomes liquid by adding 3ml tri-ethanolamine preparation gave bad odour.

➤ Write the solution on problem or challenges faced during project work/Case studies:

In order to maintain consistency of shampoo I changed the formulation table and added 0.2g of sodium citrate as surfactant.

Ingredients	Quantity
Curry leaves extract	2g
Hibiscus	2 ml
Sodium lauryl sulphate (SLS)	2g
Sodium citrate	0.2g
Hydroxyl propyl methyl cellulose(HPMC K100)	0.069g
Glycerin	1ml
Methyl paraben	0.36g
Propyl paraben	0.004g
Perfume	q.s
Colour	q.s
Purified water	Up to 20 ml

06th December 2021

To
Ms. Nikita Pandagale
Reg. No: 2020079447
Ashokrao Mane College of Pharmacy, Kolhapur.

Sub: Permission for Project Work

With reference to the above subject, we are pleased to inform that we hereby permit you to undergo project work in our Formulation Analytical Research & Development - SPD division situated at APL Research Centre- II from 6th December 2021 to 6th June 2022.

The Terms & Conditions are stated below:

7. After successful completion of project work, we will issue a completion certificate.
8. During the training, you shall follow the rules and regulations/ standing orders framed by the Management from time to time.
9. If any irregularity is observed during the period of training, the same may be cancelled on sole decision of the Management.
10. You need to produce the Identity card issued to you at the time of joining as and when requested by the security/ concerned persons in our R&D Facility.
11. You should wear only formals in the company premises.
12. You must follow & comply with all safety rules and regulations within the premises of the company.

If the above conditions are acceptable, you are advised to report on 06th December 2021 in the following address:
